

**day 12**

**I'll bring you the moon  
and even some stars!**

Welcome to the twelfth challenge of our #creativeindoorchallenge !!!  
Today, we will make a beautiful full moon to put in our room!

Please print the two following pages for as many people as you wish to participate at home.

**Today you will need cardstock (or even better, cardboard from a box!), school glue, paints (white, black, yellow, and grey), a paint brush, scissors, aluminum foil, paper, and colours or markers.**

The first part of our challenge is a crafty activity in which we will make a beautiful moon! Once you finish it, you can place it in your room to decorate it. This week we will be making more activities related to space, so let's enjoy these challenges!

Our colouring activity is about our exploration in the island, where we see stars and the moon at night. It will be full moon soon, so let's celebrate it! It will be lovely to have our own colouring book once we finish, to share it with our friends!

Have fun with this activity of our #creativeindoorchallenge with your family! Let's have fun together!

Remember to share our instagram account is [@ourboxparties](https://www.instagram.com/ourboxparties) with your friends, so we can continue creating challenges together! Tag us and use the #creativeindoorchallenge hashtag to help us see your creations so you can be participating for our final prize!

*Share this challenge with your friends, family, neighbours, and teachers!*

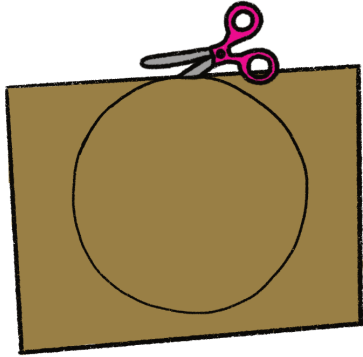

*We can be creative and fun while being indoors, and enjoy this beautiful time together!*

***Stay safe, remember to wash your hands, and enjoy being creative!!!***

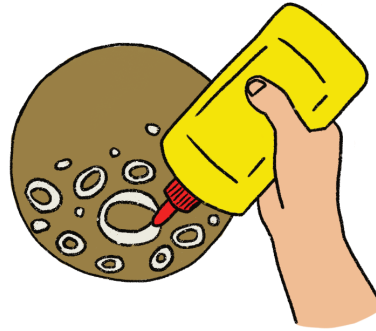

# day 12: I'll bring you the moon and even some stars!

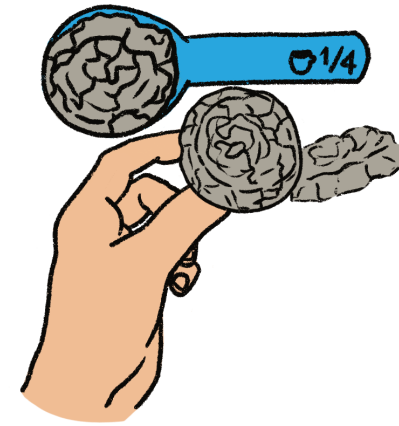

Today we will bring the moon to our room, and create a beautiful one ourselves! Enjoy this crafty activity!

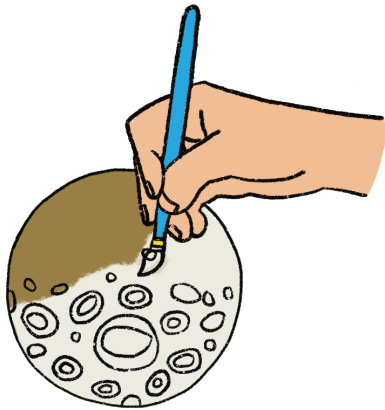

1. Grab a piece of cardboard (ideally from a box) or cardstock, and draw a big circle (25-30cm). Cut it out with some scissors.

2. Add some "craters" with the school glue, so we add a bit of texture to our moon. The more dots and craters, the better!

3. Get some aluminum foil from the kitchen and crumple it so that it fits inside a measuring cup, for example. This will be our crater brush ;)

4. Paint the moon white using your white paint and a brush. The glue must be dry by now, so you will see the great texture craters have on its surface!

5. Dip the crumpled foil on the white, grey, yellow paint, and rub it on the moon in patches. Patchy rubs pressing and releasing will make it look ultra cool!

6. There's a moon in my room now!!!! You can paste it with tape, or hang it with string!
